

Generic Project Proposal Template

- A guide for student project proposals

Project Title

- Instruction:
- Choose a descriptive and concise name for the project that clearly reflects its purpose.
- Example:
- - Library Management System
- - Online Food Ordering App

Type of Project

- Instruction:
- Specify whether it is a Web App, Mobile App, Desktop App, IoT Project, etc.
- Example:
- - Type: Web Application

Objectives

- Instruction:
- List the main goals of the project.
- Example:
- - Provide an online platform to order books
- - Enable secure online transactions

Problem Statement

- Instruction:
- Explain the real-world problems your project addresses.
- Example:
 - - Limited access to bookstores
 - - Difficulty in book discovery

Deliverables

- Instruction:
- List expected outputs and features.

- Example:
 - - Functional website
 - - Payment gateway
 - - Admin panel

Methodology

- Instruction:
- Describe the development approach (Waterfall, Agile).
- Example:
- - Agile for flexibility and iterative development

Project Overview

- Instruction:
- Describe the functionality for users and admins.
- Example:
- - Users browse and buy books
- - Admin manages inventory

Scope

- Instruction:
- Define what your project will and won't include.
- Example:
 - - Includes search and order
 - - Excludes physical delivery

Technology Stack

- Instruction:
- List tools and languages.
- Example:
 - - Frontend: HTML, CSS, JS
 - - Backend: PHP
 - - Database: MySQL

Risks and Dependencies

- Instruction:
- Identify risks and external factors.

- Example:
- - Technical issues
- - Internet dependency
